Project Initialization and Planning Phase

Template: Define Problem Statements (Customer Problem Statement Template)	**Maximum Marks: 3 Marks**
Date: 15 March 2026	**Team ID:** FV-AI-2026-X1
Project Name: FoodVerse AI	**Track:** AI/ML & Generative AI

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A health-conscious professional managing pre-diabetes and daily fitness.	Accurately track calories, protein, and glycemic carbs from homemade and restaurant meals.	Manual logging apps require endless typing, searching confusing databases, and guessing portion sizes.	Current dietary tools lack multimodal computer vision to deconstruct mixed food plates automatically.	Frustrated, exhausted by manual tracking, and uncertain whether daily health goals are genuinely met.
PS-2	A household grocery manager and family cook.	Minimize food waste and safely consume refrigerated produce before it goes bad.	Fruits and vegetables decompose unpredictably inside crisper drawers.	Early surface discoloration and fungal spoilage are hard to detect scientifically with the naked eye.	Guilty about throwing away expensive produce and anxious about serving spoiled food to family.
PS-3	A commercial restaurant operations manager & hygiene supervisor.	Ensure prep kitchen staff follow food safety, wear PPE (gloves, hairnets), and keep counters sanitary.	Continuous physical inspection during busy rush hours is impossible.	Manual checklists are subjective, sporadic, and cannot audit high-frequency kitchen shifts in real time.	Stressed about cross-contamination hazards, health department violations, and regulatory fines.
PS-4	A beginner home cook preparing dinner with leftover groceries.	Prepare a wholesome dinner quickly without scorching ingredients or touching phones with greasy hands.	Traditional online recipes assume fixed pre-bought items and require touching dirty screens mid-cook.	Recipes are static, lack real-time adaptive substitution logic, and provide zero hands-free interaction.	Overwhelmed by kitchen chaos and tempted to order expensive, unhealthy takeout instead.
